COMING TO CLARK FIELD IN THE SUMMER OF 2015

A NEW TRACK!

The new track surface will be completed by Beynon. Beynon's premier track and field surfaces are found in the world's most renowned athletic facilities, carrying some of the world's greatest champions to record-breaking times. Coe will install the BSS 1000 - a 13 mm Embedded Synthetic Track surface.

To enhance track and field competition, the Clark Field project will also include:

- New Long Jump/Triple Jump Runway
- New "D" Zone for High Jump and Pole Vault
- New Hammer/Discus Cage and Throwing Area

The Clark Field project is the first stage of a multi-million dollar Athletic and Recreation Complex Project planned for Coe College. Coe's vision is to create the best overall facilities in the Iowa Conference for athletics, recreation and fitness.

Coe College
Coe makes it possible. You make it happen.
