Greetings all! Welcome to/back to campus! I am the Director of Advising at Coe College, and I am available to answer questions or meet with any of you to talk about your academic schedule, plans for the future, whatever. Feel free to send me an email!

A couple of notes as we start the school year:

- If you *add* a class after the first day (which you can do until add/drop period is over next Tuesday), make sure you **email the professor** so that they know they have a new student, and so you can get the syllabus and do the reading or whatever work for the next class period.
- **Double-check your course schedule on my.coe** to make sure that you are properly registered for all the things you think you should be registered for. It's very easy to have accidentally signed up for a course without signing up for the lab, for example (or the reverse!). This is the time to check!
- If you are still not sure what to take to round out your schedule, **talk to your advisor now** (or shoot me an email).

Enjoy the beautiful weather! Dr. Kensky
